

Elements Valentine Card

A rich, simple design with a “fluffy” feel to warm your heart!

MATERIALS:

- Elements Earth Textures: #32 Fairy Bed, #14 Spinach, #31 Diggings, #33 Cuttings, #35 Tailings
- Elements Earth Textures Adhesive
- Ultrafine Metal Tip
- 10” x 7” Recycled Cardstock: Brown/Tan
- Heart templates: 4” & 1.5” wide
- Pencil
- Deco Scissors
- Gold Cord/Jute
- Spoon

DIRECTIONS:

Fold cardstock in half to 5” x 7”. Cut off corners with deco scissors.

Using a heart template draw a 4” heart in upper-center of card. Draw a smaller 1.5” heart in the middle of large heart. Using spout of adhesive fill in small heart. Spoon on Diggings texture first, tap of excess, cover heart again with Cuttings and finish with Tailings to fill in blank spots.

Fill in remainder of large heart with adhesive from spout again. Cover with Fairy Bed texture. Tap texture into glue with the back of spoon before tapping excess off. Reapply textures where needed.

Firmly screw on ultrafine metal tip to adhesive spout. Redefine edge of small heart by drawing an outline in glue around it, cover with Tailings. Draw a thick adhesive line around large heart. Spoon on Cuttings first then fill in with Tailings. Let dry for half an hour.

Freehand vine design below heart in adhesive, cover with Sod texture. Add leaves by placing a glue dot next to vine then drag metal tip out a touch to make a point, spoon on Sod. Continue to make Sod leaves on vines and around heart.

Place large dots of glue around vine and at each corner for flowers. Cover with Fairy Bed texture.

Make Tailings dots inbetween each leaf around heart and on center of each flower. Draw a glue line along each deco edge and cover with Tailings. Let dry.

Combine a strand of gold cord and jute to tie around center of card, knot at bottom. Tie a couple more knots along strands.
